

73% of the world's population lacks access to social protection

**Social protection is a human right and a social and economic necessity.** It contributes to reductions in poverty, vulnerability, and inequalities; increased demand for goods and services (and therefore buttress local and national economies); achievement of gender equality; and development of human capital and productivity, which lead to better economic performance.

Social protection floors (SPFs - basic social protection guaranties for all) are **affordable in the majority of developing countries** and can be financed by national resources in a sustainable manner. The initial implementation of SPFs, however, **requires start-up investments and the development of capacities** to plan, design, implement, and operate appropriate schemes and systems

	ESSENTIAL HEALTH CARE FOR ALL RESIDENTS.
	SOCIAL PROTECTION FOR ALL CHILDREN.
	SUPPORT TO ALL PEOPLE OF WORKING AGE IN CASES OF UNEMPLOYMENT, MATERNITY, DISABILITY AND WORK INJURY.
	PENSIONS FOR ALL OLDER PERSONS.

Building social protection systems for all, including social protection floors, is **part of the objectives that the international community has committed to achieve**. strategy to support the achievement of SDG targets 1.3, 3.8, 5.4, 8.5, and 10.4.
