

Force Field Analysis

1. each group identifies the change needed e.g. “everyone has access to maternity or sickness benefits”
2. each group identifies the main factors against this change or the main factors that prevent the extension of coverage, for this they can refer to the matrix from Session 1 – each group collectively assigns points out of 10 to each of the factors
3. each group identifies the main factors for this change or the main factors that facilitate the extension of coverage – each group collectively assigns points out of 10 to each of the factors
4. the points on both sides are totalled
