

Figure 3.8 Level of maternity cash benefits as a percentage of previous earnings, 2015 or latest available year

Note: Where the level of maternity benefits changes at some point during the maternity leave (hypothetical example: 100 per cent of the previous earnings for the first four weeks and 80 per cent for weeks thereafter), the figure shows the average level over the entire maternity leave. Figures in brackets refer to the number of countries in each category.
