

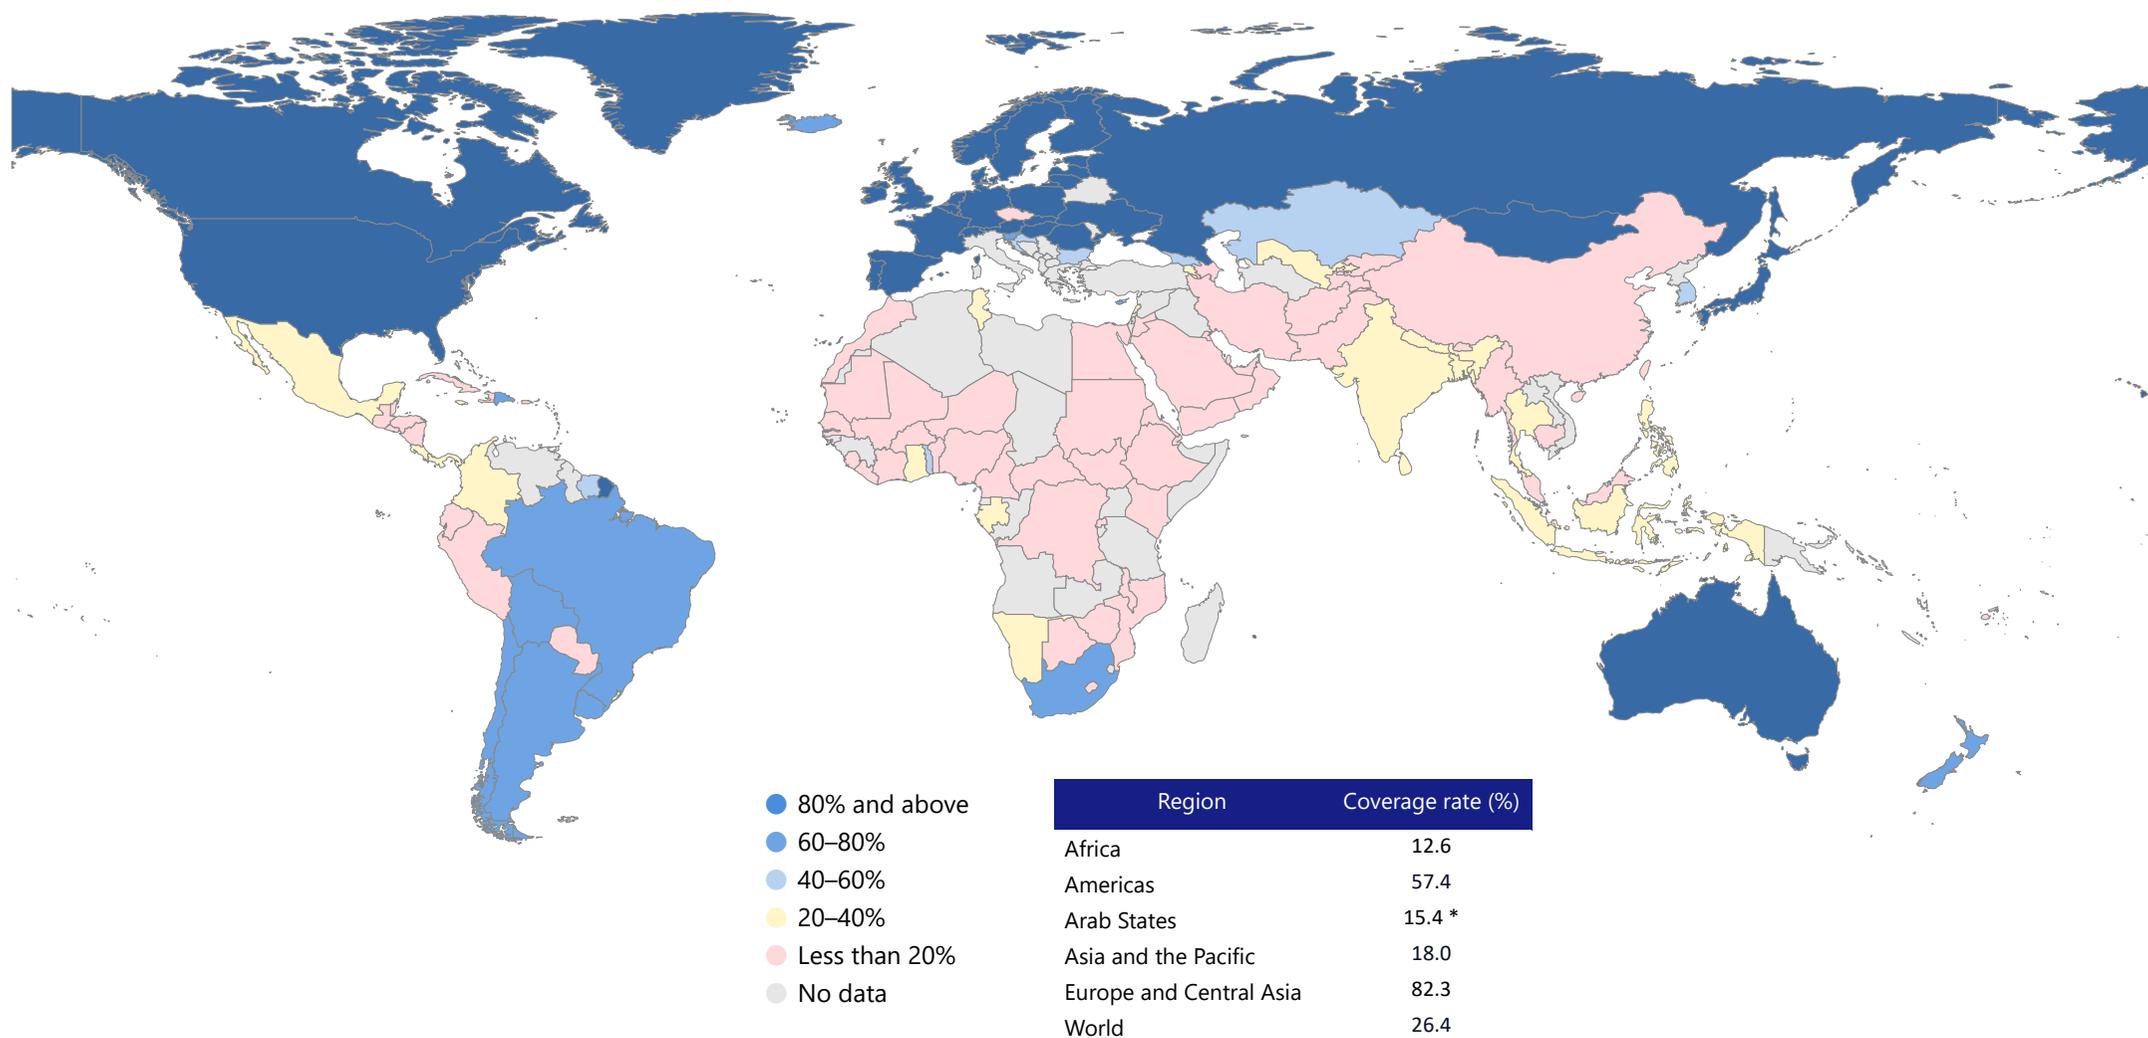

Figure 4.2. SDG indicator 1.3.1 on effective coverage for children and families: Percentage of children 0–14 years receiving child and family cash benefits, 2020 or latest available year

Note \* To be interpreted with caution: estimates based on reported data coverage below 40% of the population.

See Annex 2 for methodological explanation. Global and regional aggregates are weighted by population 0–14 years. Estimates are not strictly comparable with 2016 regional estimates owing to methodological enhancements, extended data availability and country revisions.
