Introduction

- **ILO** “WORLD SOCIAL SECURITY REPORT 2010/11” (2011): Almost all countries around the world provides a certain degree of social security service, but only a few countries set up an comprehensive social security system, social security in many countries are limited to a few projects.

- Only one-third countries of the world's, representing 28% of the population, has established a comprehensive social security system that covers all kinds of branch project in “Social Security (Minimum Standards) Convention, 1952 (No. 102)”

- It is estimated that only 20% of the world's working-age population (and family) really covered by a comprehensive social security system.

- China is a developing country with 1.36 billion population. Currently, China has established the world's largest and comprehensive social security system, have all branch project which defined in “Social Security (Minimum Standards) Convention, 1952 (No. 102)”, and achieved a universal coverage of basic medical insurance.
Abstract:

At present, China has formed a comprehensive social security system which based on all kinds of social insurance, social relief and social welfare projects. Basic endowment insurance, basic medical insurance, subsistence allowances as the fundamental part; supplemented by charity and commercial insurance, and also include Social Special Care, military insurance, housing guarantee system.

Among them, the Social insurance system, which include endowment insurance, medical insurance, unemployment insurance, industrial injury insurance, maternity insurance, is the core of social security system.

At the end of 2015, national insured number in basic medical insurance is 1.33 billion, basic endowment insurance is 840 million; the number of unified social security card is 884 million.

In 2015, social insurance fund revenue is 4.7 trillion yuan, fund expenditure is 3.9 trillion yuan, total accumulated balance more than 5 trillion yuan.

Ⅰ. towards a new era of universal social security coverage
Social insurance system

Entitled groups got subsidy accumulative total about 4.365 million person-time, expenditure is 3.5 billion yuan.
II. major experience on universal social security system development in China

(a) China established the national social security system development goals and action plan

- As early as 2006, China proposed the development goal of universal social security system, and plan to achieve it by 2020, which formulated and implemented “universal coverage, protect the basic benefit, multi-level, sustainable" approach, and emphasis on enhance the fairness, adapt the mobility, ensuring sustainability.

- “13th Five-Year Plan " period (2016-2020) to comprehensively promote the implementation of the social security reform measures, improve and perfect the social security system, the basic realizing a complete coverage of legal target groups, to build a more fair and more sustainable social security system, make every citizen can enjoy social security equally and legally.
(b) promote reform, improve social security system

To establish a more fair and more sustainable social security system, a series of reform measures were taken:

- Integration of social security policy and management for urban and rural residents, establishment of a unified endowment insurance system and basic medical insurance; Fully implementation serious illness insurance.
- Reform the pension system for government employee, make an unified basic endowment insurance system for urban employee.
- Reasonable definition responsibility among the government, enterprises and individuals, perfecting the financing mechanism; Appropriate to reduce social insurance rates.
- Gradually improve the pooling level, fundamental annuities for urban employee will gradually realize the national pooling; Medical insurance, employment injury insurance, matrenity insurance will gradually achieve provincial pooling.
- Establish a reasonable social security benefit definition and adjustment mechanism.
- Will operate and investment of basic endowment insurance fund.
- Reform of medical insurance payment methods, promote fund balance.
- Encourage the development of supplementary insurance, including enterprise annuity, occupational pension, supplementary medical insurance, commercial endowment insurance and health insurance, etc.
In July 2014, China launched a universal coverage plan, carry out pilot projects in some areas. Extended their pilot projects to around 50% regions in 2015, full implementation in 2017. From 2016 to 2020, it will increase 100 million insured in basic endowment insurance; By 2020, the endowment insurance coverage rate will reach 90%.

Under the universal medical insurance coverage, focus on dual-insured and leakage problems. Promote high-risk enterprises participate employment injury insurance, especially the migrant workers in construction enterprises, medium small and micro enterprises and self-employed who hire employees, explore to extend coverage in family oriented service enterprise, network service enterprises and the rural enterprises.

In unemployment insurance will further expand coverage, gradually achieve universal coverage. To further standardize the maternity insurance policy, expand coverage to all kinds of enterprises and institutions and its employees.

Through the full implementation of universal coverage plans, promote all kinds of legal target groups universal coverage.
(d) more government spending on social security

- In 2015, in the national fiscal expenditure, social security and employment expenditure is 1.9 trillion yuan, accounting for 10.8% of the ($17.6 trillion) fiscal expenditure.

- Among them, governments subsidies for the basic endowment insurance is 471.6 billion yuan, accounting for 2.68% of the financial expenditure; In recent years, the annual growth rate of financial subsidies to basic endowment insurance for urban employee is about 17%.

- Including financial subsidies for basic medical insurance more than 200 billion yuan (including 158.5 billion yuan for urban and rural residents medical insurance, Fiscal subsidies reached 380 yuan per capita.

- Fundamental annuities treatment is paid by governments, which account for more than 85% expenditure in insurance. In addition, local government pay subsidies to insured not less than 30 yuan per insured.
Conclusion:

- China is advancing a series of reforms in social security, and constantly improve and perfect the system, gradually shift from largest system to more effective and sustainable social security system, endeavor to realize the ideal of fairness for all to enjoy social security!
Thank you!
